

## Compaq ProSignia 200 Small Business Server

### DESIGNED FOR SMALL AND GROWING BUSINESSES

Compaq ProSignia 200 Small Business Server is designed as a turnkey solution for small businesses needing low cost file/print database and communications capabilities without the overhead of an IT organization. If you run your network of 25 or fewer PCs from a single server and want big business capabilities, the Compaq ProSignia 200 Small Business Server enables you to:

- Send and receive mail across the room, across the country, or around the world
- Efficiently share data between multiple employees.
- Safely extend your business to the Internet, either by hosting a local WEB server or through an Internet service provider
- Send, receive and manage FAX messages from your PC
- Backup and protect your organization's information easily and safely
- Maximize your investment in peripherals like printers and modems by sharing them among a workgroup
- Choose from thousands of additional applications compatible with the Microsoft® BackOffice® Small Business Server platform

### WHAT'S NEW?

- ▶ Compaq Insight Agent Event Notification tool
- ▶ New 300 MHz Pentium® II processor for growing businesses requiring the latest in processor technology
- ▶ ECC Memory standard on all ProSignia 200 6/300 models (6/233 models will continue to be configured with EDO Memory and upgradeable to ECC)

### COMPREHENSIVE SOFTWARE SUITE

The Compaq ProSignia 200 Small Business Server Hardware comes with a comprehensive suite of industrial-strength software products from Compaq and Microsoft to help you run your growing business. The software components include licenses, easy-to-use management tools, the latest version of Microsoft Windows NT® Server, Microsoft SQL Server to run the database backbone of your business, and Microsoft BackOffice Small Business Server applications to manage e-mail, Internet connections, Web hosting and development, fax capabilities and more.

### EASY TO UPGRADE

Your Compaq ProSignia 200 Small Business Server scales gracefully to meet future needs. It's easy to add more memory, drive capacity and new capabilities through expansion card slots. If you outgrow the 25 user limit of Microsoft BackOffice Small Business Server, simply upgrade to Microsoft BackOffice with the capability to serve unlimited users (with the appropriate client access licenses), along with connection software (SNA Server) and Advanced Systems Management (Microsoft SMS) in the same familiar easy-to-use interface.

# Compaq ProSignia 200 Small Business Server

  - Microsoft Proxy Server
  - Modem Sharing Server
  - Small Business Server Console
  - Compaq Insight Agent Event Notification tool

## EXTENSIVE SERVICE AND SUPPORT

With Compaq as your business partner, you can count on an extensive set of support options starting with toll-free hardware technical support every hour of every day. The Compaq Software Application Support Center provides support for many popular business software applications suites such as Microsoft Office, Lotus SmartSuite and Corel WordPerfect Suite. You can sign up for this service through your reseller.

Preinstalled by Compaq, and integrated into the Microsoft Small Business Server console, is the Compaq Insight Agent Event Notification tool. This Compaq-developed server management tool is preconfigured to work in the background, monitoring key system "events", notifying designated users and/or service providers via self-generating electronic mail messages. Small business customers purchasing the Compaq ProSignia Small Business Server now receive a preinstalled system management tool which will help minimize downtime, and maximize productivity of their key network server.

Using the configuration wizard, the Small Business customer specifies those individuals, both internal and external to the company, whom they would like to have automatically notified of key system events. Including the date, time, computer ID, nature and severity of the event, these notifications allow the customer, or their service provider/VAR, to intervene early, fix potential problems, and ensure that the Compaq Small Business Server continues to address their business needs at maximum efficiency.

## OPTIMUM RELIABILITY

Because running your business is more important than running your computer network, Compaq has built a number of reliability features into the server to give you peace of mind. These include Error Checking and Correcting (ECC) Memory (standard on 6/300 models), SMART self error detecting Disk Drives, Server Class SLR SCSI Tape Drive, Automatic Server Recovery and Compaq Insight Manager to help you head off any potential problems.

## LEASE AND TECHNOLOGY PLAN

An optional lease and technology upgrade plan is offered through Compaq Capital for the 6/233 MHz models and the 6/300 MHz models.
