

Project 1 – Photo Collage

Materials

- Color inkjet printer
- Printable photo paper
- Poster board or foam core
- Photo adhesive or double-stick tape
- Scissors – straight- or fancy-edged
- Paper trimmer
- Photo frame – one that fits finished collage
- Photos (We recommend about 15, though it depends upon the size of the collage)

Choose a theme for the center square

Print one of the pages of this PDF onto high-quality paper. We recommend HP Bright White Inkjet Paper.

- Father's Day – page 2
- Wedding – page 3
- Baby – page 4
- Summer camp – page 5
- Graduation – page 6

Instructions

1. After importing photos into your PC, you can use photo-editing software like Microsoft® Picture It! for extra creative effect.
2. Using printable photo paper, print all your imported pictures.
3. Cut your photos by following the shape of the person, place, or thing in the picture. Use fancy-edged scissors for extra flair.
4. Cut the poster board to the size of the frame you have chosen. We suggest a 12" x 12" frame.
5. Trim your printed center square using straight-edged scissors. Using double-stick tape, affix the square to the center of the trimmed poster board.
6. Arrange the photos from step 2 around the center square. Once you've created your desired design, begin mounting the photos to the poster board using the adhesive or tape.
7. When you have completed your collage, place it in the photo frame. Smashing!
