SmartStart Scripting Toolkit 1.9

Support Matrix

The SmartStart Scripting Toolkit provides the ability to build an automated, unattended server deployment solution for high-volume server deployment.

IMPORTANT: Because the SmartStart Scripting Toolkit practices align with SmartStart releases, version 1.8 and forward of the Toolkit is optimized for SmartStart 6.0 and later, while SmartStart Scripting Toolkit version 1.7 and earlier will align to releases of the SmartStart 5.x family. For additional information, visit www.hp.com/servers/sstoolkit.

Hardware Support

The following tables show the HP hardware that is supported by the SmartStart Scripting Toolkit. While all of the Toolkit utilities, except the Configuration Replication (CONREP) utility, should run on all unsupported servers, the utilities have been tested only on the servers listed in Table 1, Table 2, and Table 3, and the server options listed in Table 4.

NOTE: The Integrated ATA RAID Replication Utility (HYPERCFG) only supports the embedded AMI ATA RAID controller in the HP ProLiant ML310, ML330 G2, and DL320 G2 servers.

Operating System Support

The SmartStart Scripting Toolkit supports the following operating systems:

- Microsoft Windows NT 4.0
- Microsoft Windows 2000 Server
- Microsoft Windows 2000 Advanced Server
- Novell NetWare 5.1
- Novell NetWare 6
- Red Hat Linux Advanced Server 2.1
- Red Hat Linux 7.3
- Red Hat Linux 8.0 Professional NEW

IMPORTANT: Updates to the Linux files (init.rd) may be required to support various servers and server options.
