

HP ProLiant 100 series family of servers.

Simply affordable.

Affordable to buy and efficient to own,
the HP ProLiant 100 family of servers
delivers unmatched computing value.

Affordable HP ProLiant 100 series.

The cost is small. The performance isn't. Now you can get robust functionality that's as affordable to own as it is to buy.

The HP ProLiant 100 family of servers was created for growing businesses that need high performance at an affordable price.

With the HP ProLiant 100 series, affordable means a fast and easy setup. It means industry-standard components for lower ongoing costs. It means more computing power in less space. It means Lights-Out 100 for simple, affordable remote management.

In short, affordable means high performance at a low cost from the #1 family of servers on earth—HP ProLiant.¹
