Simply reliable.

High performance. Low maintenance.
Dependability your growing business
can count on.

Reliable HP ProLiant 100 series.

Designed for growing businesses that can't afford to have their systems fail.

The HP ProLiant 100 family of servers was created for continuity, security, and efficiency to minimize risk to your business. With built-in SATA RAID protection or Smart Array RAID controllers, your data is protected and your business will keep running.

HP Lights-Out 100 management increases productivity, saves time, and provides simple access and monitoring for effective, affordable remote management.

HP ProLiant servers are backed by HP's worldwide, world-class service and support—one reason they're the #1 family of servers on earth.[1]
