HP ProLiant DL100 G2 Data Protection Storage Server

Data sheet

The HP ProLiant DL100 G2 Data Protection Storage Server is a NAS appliance that uses Microsoft® System Center Data Protection Manager (DPM) to provide rapid and reliable recovery, near continuous data protection, and operational simplicity for disk based backup of Windows® file servers.

Disk-based backup and end user restore makes DPM one of the fastest and most cost effective methods to recover file data lost to user error or equipment corruption. HP has worked closely with Microsoft to develop DPM configurations that are optimized for disk-based backup and recovery of Windows file servers. The HP ProLiant Data Protection Storage Server family offers an easy to deploy DPM solution that provides immediate business value.

The SATA-based DL100 G2 Data Protection Storage Server is available in 1 TB, 3 TB and 6 TB configurations suitable for organizations wanting to protect Windows file servers in the data center and branch office. This platform provides features such as expansion ports and remote management.

The DL100 G2 Data Protection Storage Server complements existing IT data protection infrastructures and is non-disruptive to IT environments. They can be extended into the data protection value chain through optional SCSI interface and tape backup software to deliver a complete disk-to-disk-to-tape data protection framework.

HP offers the broadest portfolio of data protection solutions to keep your data safe so you can put your information to work.

Key features and benefits

- Faster recovery—90 percent faster recovery than tape backup with fewer IT resources. Backup to disk is the most reliable way to recover lost data files. Users can instantly recover previous versions of their own files, increasing productivity and allowing IT resources to concentrate on other tasks.
- No more failed recoveries—Disk-based backup offers a higher level of reliability versus tape backup solutions.
 The HP ProLiant Storage Server platform, RAID configured Modular Smart Array storage and online verification and administrative alert functionality gives IT administrator's peace of mind.
- Near continuous protection—This integrated solution can be used for backup at fixed intervals based on business policy so that critical data can be protected at all times, thus reducing risk exposure and minimizing potential data loss between backups to an hour, a 96 percent reduction over daily tape backups.
- End-user file restore—Enables end users to perform their own file recoveries from Windows® XP or Office XP for accidental file deletion or corruption. Snapshot

A cost-effective and easy to use disk-based backup solution that is optimized to provide near continuous protection for Windows file servers while allowing end users to restore their own files.

The HP ProLiant DL100 G2 Data Protection Storage Server is a NAS appliance utilizing Microsoft Data Protection Manager (DPM) to provide rapid and reliable recovery, near continuous data protection and operational simplicity for disk-based backup of Windows file servers. Pre-configured in 1 TB, 3 TB and 6 TB models, and optimized as the fastest and most cost effective solution for file recovery, it is ideal for customers wanting to protect Windows file servers in the datacenter or branch office.

- technology allows users to restore point-in-time recoveries from previous versions of individual files.
- Ease of installation—DL100 G2 Data Protection Storage Server is fully pre-configured and optimized for out of the box deployment. Automatically discovers and alerts administrators that unprotected servers are on the network and the comprehensive wizard interface reduces the time it takes to protect valuable file data.
- Low total cost of ownership (TCO)—Estimates put 70 percent of the cost of backup and recovery related to manual labor. This solution integrates within the existing Windows environment, automates much of the backup/restore function and overcomes many deficiencies and costs associated with tape only backup systems.
- Integrates easily—Designed to work with existing tape backup and data protection strategies as well as file servers running Windows Server 2000 or 2003. Also works natively with Windows Storage Server 2003 based products such as the HP ProLiant Storage Server family. Supports network throttling to maximize network performance.

- Eliminates backup window issues—Eliminates the need to plan backup windows for production file servers. Storage growth due to regulatory compliance, business expansion, and increasing globalization has caused businesses to no longer have open time for backup and for those backups to take longer than the time available.
- Flexible backup scheduling and verification—
 Production file server replication and shadow copy settings can be independently managed to meet the recovery objectives of individual customers. Verification is as easy as browsing the disk on the Data Protection Storage Server.
- Powerful platform for growth—Features a 2.8 GHz dual-core processor, up to 4 GB of memory, hardware RAID, and remote management via IPMI 2.0. Available Smart Array expansion cards allow for future expansion via Modular Smart Array storage such as in the 3 TB and 6 TB models.

HP ProLiant DL100 G2 Data Protection Storage Server

DL100 G2 Data Protection Storage Server (6 TB)

Form factor	1 TB model—1U 3 TB/6 TB models—1U base + 2U per Modular Storage Array (MSA) 20	
Processor	One Intel® Pentium® 2.8 GHz dual core/800 MHz FSB, 2 MB L2 cache	
Memory	1 GB of memory standard, expandable to 4 GB	
Network controller	Embedded dual port Broadcom 10/100/1000 NIC	
Storage controller	Internal hardware based SATA RAID controller (1 TB model) 6402 Smart Array controller with 128 MB battery backed up write cache (3 TB/6 TB models)	
Internal storage	1 TB model—(4) x 250 GB drives 3 TB/6 TB model—(2) x 160 GB O/S drives	
External storage	3 TB model -1 MSA 20 with 12 \times 250 GB drives 6 TB model -2 MSA 20 cabinets each with 12 \times 250 GB drives	
Total raw capacity	1 TB / 3 TB / 6 TB depending on model	
Operating system	Windows Storage Server 2003 Standard Edition	
Integrated software	Microsoft System Center Data Protection Manager 2006	
RAID	Fully preconfigured with RAID 5 across DPM storage pool	
Data protection profile	1 TB model should protect approximately 460 GB of file data 3 TB model should protect approximately 1.54 TB of file data 6 TB model should protect approximately 3.08 TB of file data	
	NOTE: Remaining capacity is used by RAID and Microsoft DPM for application overhead. Protection profile will vary depending on change rate in customer environments.	
Microsoft data protection management licenses	3 DPMLs. Additional DPMLs required for each additional production server protected by Microsoft DPM.	
Fault tolerant features	Hot swappable drives with single hot spare drive per MSA20 on external storage models.	
Tape backup support	Optional SCSI HBA can be used to connect to a wide array of HP StorageWorks Tape drives. Microsoft DPM supports a number of third party applications for backing up file data to tape.	
Ordering information		
Product number/SKU	Product name	Description
397593-B21	HP DL100 G2 1 TB Data Protection Storage Server	1 TB of raw internal storage comprised of 4 x 250 GB SATA hard drives, hardware RAID. Includes Microsoft DPM license to protect three Windows file servers. Can protect approximately 460 GB of file data.
398714-B21	HP DL100 G2 3 TB Data Protection Storage Server	3 TB of raw external storage in one MSA20 with 12 x 250 GB SATA hard drives (one hot swap spare), 6402 Smart Array Controller with 128 MB write cache and hardware RAID. Includes Microsoft DPM license to protect three Windows file servers. Can protect approximately 1.54 TB of file data.
398715-B21	HP DL100 G2 6 TB Data Protection Storage Server	6 TB of raw external storage in two MSA20's with 24 x 250 GB SATA hard drives (1 hot swap spare per MSA20), 6402 Smart Array Controller with 128 MB write cache and hardware RAID. Includes Microsoft DPM license to protect three Windows file servers. Can protect approximately 3.08 TB of file data.
Options:		
403557-B21	Microsoft® SC Data Protection Management LTU 2006	License for one additional DPM Server Agent. One Server Agent license needed per protected Server.
374654-B21	Single Channel SCSI HBA	64-Bit/133 MHz Single Channel Ultra320 SCSI HBA G2
390825-B21	512 MB additional memory	512 MB of Advanced ECC PC4200 DDR SDRAM DIMM Memory Kit (1 x 512 MB)
390824-B21	1 GB additional memory	1024 MB of Advanced ECC PC3200 DDR SDRAM DIMM Memory Kit (1 x 1024 MB)

HP ProLiant DL100 G2 Data Protection Storage Server

Warranty and services

The HP ProLiant DL100 G2 Data Protection Servers each come with a 3-1-1 warranty (3 years parts exchange, 1 years labor, and 1 year on-site, next business day response) for product hardware. Note that standard HP warranty ensures Software media will be free of physical defects for a period of 90 days from delivery. However the HP ProLiant Data Protection Manager products all come with a full year of 9x5 days software advisory and remedial software telephone support, new version license rights, and media and documentation distribution service.

- The HP ProLiant Data Protection Manager product software support can be uplifted to include:
- SW Phone-In, 24x7, 2 hour call back
- SW Support for Storage, 24x7 2 hour call back

HP Care Pack Services

HP Care Pack Services offer upgraded service levels to extend and expand your standard product warranty with easy to buy, easy to use support packages that help you make the most of your hardware and software investments. They let you choose the support levels that meet your business requirements, from basic to mission-critical. They help you contain total cost of ownership. HP Care Pack warranty extensions can be purchased along with HP products to cost-effectively upgrade or extend your warranty. For many products, post-warranty HP Care Pack Services are available when your original warranty has expired. HP Care Pack availability may vary by country and product.

Why purchase an HP Care Pack service?

Your standard warranty protects against product defects. HP Care Pack Services help you guard against unplanned downtime, which can reduce your productivity and profitability. These convenient service packages:

- Protect your investment in HP products
- Provide consistent, predictable levels of support across your entire department or business
- Ease budget planning with fixed-cost support that includes parts and labor
- · Give you direct access to proven technical and problem-solving expertise
- Offer a choice of response-time and repair-time commitments
- Deliver prompt, measurable results
- Are available whenever and wherever you do business

HP Care Pack availability may vary by country and product.

For additional information on Product Services and HP Care Pack, as well as orderable part numbers, please visit: www.hp.com/hps/carepack

If you have specific questions about availability or how to obtain services contact your local HP representative. Contact information for your local area can be found at: www.hp.com/services

eSupport

HP eSupport is a portfolio of technology-based services that assist you with managing your business environment—from the desktop to the datacenter.

Support portal: The HP support portal provides one-stop access to the information, tools and services you need to manage the daily operations of your IT environment. Features include: Access to self-solve tools (including search technical knowledge base); efficient logging and tracking of support cases; collaboration with other business and IT professionals; download of patches and drivers; access to diagnostic tools; and proactive notification of relevant information. Access to certain features of the support portal requires an HP service agreement. To access the support portal, visit www.hp.com/support

HP education services
