

Compaq Rack 7000 Series Options

The Compaq Rack 7000 Series options allow for additional stability and security. These options will EOL in June of 2001 and DISC in September of 2001.

Rack 7142 Side Panel

Worldwide 165652-001

The Rack 7142 Side Panel Kit contains the side enclosures for the Rack 7142; they are bolted onto the rack. Two side panels included a kit.

Rack 7142 Coupling Kit

Worldwide 165664-001

The Rack 7142 Coupling Kit is used to join multiple Rack 7142 units together. Sides of adjacent frames are bolted together and optional sidewall panels are then placed on the two ends of the rack suite.

Rack 7142 Stabilizing Feet

Worldwide 189907-001

Japan 189907-291

The Rack 7142 Stabilizing Feet mount to the front base and sides of a stand-alone Rack 7142 for stability. Stabilizing feet are not needed for coupled racks. The kit contains one foot for the front and one foot for each side of the rack.

High Airflow Door Insert

Rack 7142

Single Pack 327281-B21

6-pack 327281-B22

Rack 7122

Single Pack 157847-B21

The High Airflow Door Insert is a mesh front door insert that helps facilitate proper cooling in the Rack 7000 Series that should be used when high capacity products are mounted in the rack.

7142 Extension Kit

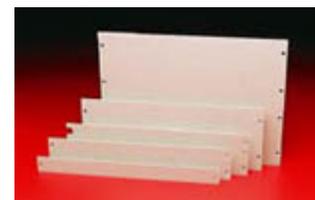

Worldwide 154392-B21

The extension kit for the Rack 7142 (42U) is a steel collar that attaches to the front and/or rear of the rack. This feature allows customers additional space in the rack for large equipment or cable management. The kit comes with two collars.

Blanking Panels Kit

Worldwide 169940-001

Blanking Panels are sheet metal plates used to cover any unused area within the rack. They help facilitate proper airflow to the rack components. One of each size, 1U, 2U, 4U, and 8U, included a kit and come in Beach Gray for the 7000 Series Rack.

A "U" is the measuring unit for racks and rack-mountable components. 1U = 1.75" or 44.45 mm.
