

Compaq *iPAQ*™ BlackBerry™ Wireless E-mail Solution Bundle

Wireless E-mail Solution for Microsoft® Exchange

Overview

Reinforcing Compaq's e-business Solutions strategy, Compaq has designed a complete end-to-end wireless e-mail solution package utilizing award winning RIM technology. The Compaq *iPAQ* BlackBerry Wireless e-mail Solution Bundle is designed specifically for corporate environments using Microsoft Exchange. This e-mail solution is a manageable, cost effective, enterprise solution for organizations seeking to provide mobile users with a valuable productivity tool.

Description

Compaq has designed and pre-tested a wireless solution package in conjunction with our wireless partner, Research In Motion. The package includes software, hardware and services.

Standard Configurations

- > Compaq ProLiant ML330
- > Microsoft® Windows NT® Server 4.0 or Windows 2000

- > BlackBerry Enterprise Server Software
- > Nationwide Coverage and Flat Rate Pricing
- > *iPAQ* BlackBerry Wireless Handhelds
- > Installation and Startup Services

BlackBerry Enterprise Server Software

With the BlackBerry Enterprise Server software, you can deliver the benefits of wireless e-mail to mobile users across your organization. The BlackBerry Enterprise Server is a Windows NT service that monitors the mailboxes of all BlackBerry users in your organization. Each time a new message arrives in a user's mailbox, the BlackBerry

Enterprise Server passes an encrypted copy of the message to the user's handheld. The BlackBerry Enterprise Server addresses crucial corporate requirements regarding remote e-mail access:

- > Centralized Administration of Users and Servers — The BlackBerry Enterprise Server's user and server administrative tools fully integrate with Microsoft Exchange Administrator.
- > Scalability and Reliability — A single BlackBerry Enterprise Server can support hundreds of BlackBerry users within your enterprise.
- > Performance and Monitoring — The BlackBerry Enterprise Server Alert provides constant monitoring and notification of BlackBerry Enterprise Server performance.
- > Security — BlackBerry software uses Triple DES encryption. E-mail messages remain encrypted and confidential at all points between the user's mailbox and their *iPAQ* BlackBerry Handheld.

BLACKBERRY

Compaq *iPAQ*™ BlackBerry™ Wireless E-mail Solution Bundle

Powerful Wireless Handheld with Connected Organizer

The *iPAQ* BlackBerry Handheld is based on a 32-bit Intel386™ processor, and includes a wireless modem, integrated e-mail/organizer software and PC docking cradle. Creating and retrieving information is amazingly simple using the optimized keyboard, thumb-operated trackwheel, easy-to-read backlit screen and intuitive menu-driven interface. The *iPAQ* BlackBerry Handheld is also a full-featured connected organizer, complete with calendar, address book, and task list, that automatically synchronizes with the user's desktop Personal Information Management software when placed in its docking cradle.

Nationwide Coverage and Flat Rate Pricing

BlackBerry operates over the BellSouth Intelligent Wireless Network™ in the United States and the Rogers® AT&T™ wireless data network in Canada. Both networks offer broad coverage, nationwide roaming, fast messaging and reliable delivery for one monthly flat rate price of \$39.99.

BlackBerry Enterprise Server Software Installation and Startup Service

The Installation and Startup Services include:

- > Preparation of the BlackBerry Enterprise Server on the *ProLiant* ML330.
- > Installation and Startup of the BlackBerry Enterprise Server Service for up to 250 users.
- > Brief orientation for the system administrator with pointers to applicable support.
