Downloading and Installing from the CD ISO image

You can download the SCO OpenServer Release 5.0.7 Supplement CD Version 5 ISO image (*osr507suppcd5.iso*) from the SCO OpenServer Release 5.0.7 Supplements web or ftp sites at:

http://www.sco.com/support/update/download/osr507list.html

or

ftp://ftp.sco.com/pub/openserver5/507/iso/osr507suppcd5

If your **ftp** download session of the Supplement CD Version 5 ISO image terminates with an error before downloading the entire ISO image, you can use the **ftp**(TC) **reget** command to restart the download from where it left off. When the download is complete, verify the sum of the ISO image.

Once you have downloaded the ISO image, write the ISO image to a CD using any Windows or UNIX CD recording software, such as the **cdrtools** recording tools that are available from the SCO OpenServer Release 5.0.7 Maintenance Pack 3 or later.

After the CD is recorded, you can use the CD to install any of the products provided in the Supplement. For specific product installation information, see the */info/readme.txt* file on the CD.
